CHICAGO 16, ILLINOIS

GAS ABSTRACTS

VOLUME 12

1956

AFFILIATED WITH

ILLINOIS INSTITUTE OF TECHNOLOGY

Gas Abstracts is published and distributed monthly by the Institute of Gas Technology. The current technical literature is reviewed and articles pertaining to the Gas Industry are abstracted. These abstracts are grouped by subject and arranged alphabetically in each group. The thirteen groupings are presented below—

Contents

1. Gas Industry—General information and news items, statistics, business regulations, and other articles of general interest.
2. Appliances—Burners, ranges, cooking equipment, air conditioning equipment, water heaters and other gas appliances for domestic and commercial use.
3. Combustion and Industrial Furnaces—Combustion of gaseous, liquid and solid fuels; design of industrial furnaces; control of furnace atmospheres.
4. Carbonization and Gasification—Manufacture and purification of producer gas, blue gas, carburetted water gas, synthetis gas; carbonization and gasification of coal; and gasification of oil.
5. Natural Gas and Natural Gas Condensates—Production, transmission, distribution and storage of natural gas and natural gas condensates; distribution of LP-gas mixtures; carbon black and chemicals from natural gas and natural gas condensates.
6. Petroleum and Synthetic Liquid Fuels—Production, refining, cracking, alkylation, isomerization, and utilization of petroleum and production of synthetic liquid fuels by the Fischer-Tropsch reaction and hydrogenation.
7. Analytical Methods and Tests—New and improved methods pertaining to gas making materials, processes, products, and by-products.
8. General and Physical Chemistry—Data on chemical and physical properties of elements and inorganic compounds; new reactions; and methods for carrying out established reactions.
9. Organic Chemistry—Data on organic compounds closely related to the Gas Industry; new reactions; new methods.
10. Chemical Engineering—Data and methods for fluid flow, heat transfer, and unit operations of distillation, evaporation, extraction, drying, and filtration.
11. Process Equipment and Instrumentation—Information on new equipment for process operations and process control.
12. Materials of Construction—New developments in refractories, heat and corrosion resistant materials, new alloys applicable to the Gas Industry, and other materials of construction.
13. New Books—Recent books pertaining to the field of gas technology.

The Institute of Gas Technology was founded in 1941 by members of the Manufactured and Natural Gas Industry to accomplish the following objectives:

1. *To train personnel for the Gas Industry.*
2. *To collect and disseminate scientific information of interest to the Gas Industry.*
3. *To prosecute fundamental and applied research for the Gas Industry.*
4. *To stimulate and correlate research within the Gas Industry.*

Inquiries may be addressed to:

AUTHOR INDEX

A

Abbott, A. H. *Control of Underground Gas Leakage* 163

Abell, C. *Agricultural Flaming: Hi-Yo, Silver! Propane Rides The Range; Propane Cuts Cost of Weed Control On Railway Rights-of-Way* 112; See Sipchen, R. J.

Abendroth, G. F. *Fracturing Formations Selectively* 12

Abrams, E. R. *The Outlook for Natural Gas Earnings* 121

Acrivos, A. and Amundson, N. R. *On The Steady State Fractionation of Multicomponent and Complete Mixtures in an Ideal Cascade. Part V. The Extension To Packed Columns* 19; *Part VI — The Effect of Variations of The Relative Volatilities, The Flow Rates and The Plate Efficiencies* 57

Adair, R. V. See Ernst, C. E.

Adams, C. P. *USSR Pushes Natural Gas Industry* 61

Adams, E. *Attack on Shortage of Scientists and Engineers* 141

Adams, J. O. See Alexander, W.

Adams, N. G. See Coleman, H. J.

Agard *Combustion Researches and Reviews, 1955; Spontaneous Ignition of Liquid Fuels* 60

Agnich, F. J. *Exploration for Reefs by Geophysical Methods* 225

Air Pollution Foundation See Bowerman, F. R.; Faith, W. L.; Goedhard, N.; Hitchcock, L. B.; Southwest Research Institute

Air Reduction Co., Inc. See Bronson, S. C.; Teti, J.

Akers, W. W. and Burns, J. D. *Compressibility Factors of Mixtures* 115;—and Sampson, O. A. *Shorten Heat Transfer Problems* 117

Akimov, G. W. *Electrode Potentials. Part I* 38;—*Part II* 59

Aktiebolaget Elektrolux See Grubb, G. A.

Alderson, W. T. *Selection of a Compressor* 202

Aldridge, C. *Planning The Offshore Line* 181

Alex, N. H. See Waack, R.

Alexander, W. *Symposium On Capital Cost Estimation* 154

Alexander, W. A. See Cambron, A.

Allan, D. L. *The Prevention of Atmospheric Pollution In The Carbon Black Industry* 9

Allen, A. See Alexander, W.

Allen, C. H. and Tauschek, M. J. *Corrosion of Gasoline Engine Exhaust Valve Steels* 99

Allen, D. B. See Stamm, H. E., III.

Allen, G. G. See Gray, G. R.

Allen, H. I. Jr. See Easthagen, J. H.

Allied Chem. & Dye Corp. See Eastman, D. E.; Merriam, H. F.; Silsby, C. F.

Almond H., Crowe, H. E., and Thompson, C. E. *Rapid Determination of Germanium in Coal, Soil and Rock* 15

Altenkirch, E. *Absorptions-Kaeltemaschinen (Absorption Refrigeration Machines)* 40

Althouse, A. D. and Turnquist, C. H. *Modern Refrigeration and Air Conditioning* 100

Aluminum Co. of America See Short, H. M.

Ambrose, E. R. See Sporn, P.

American Chemical Society *Literature Resources For Chemical Process Industries* 40

American Gas Association *Reserves Gain 12 Trillion Cu. Ft.* 81; See Chaney, N. K.; Cushman, J. A.; Griffiths, J. C.; Hammacker, F. G.; Jacobson, R. A.; Reed, H. L.; Shaw, B. C., II; Turner, C. A.

American Institute of Mining and Metallurgical Engineers *Statistics of Oil and Gas Development and Production* 40

American Meter Co., Inc. See Weingard, A. E.

American Petroleum Institute *Why The API Returned To The 30° Bevel* 60

American Society of Mechanical Engineers *American Standard Code For Pressure Piping* 40

American Society for Testing Materials *A.S.T.M. Symposium on Odor* 16

Amundson, N. R. See Acrivos, A.

Anderson, C. O. and Gardner, K. L. *Here's A Model Waste-Disposal System* 32

Anderson, E. E. See Kohl, J.

Anderson, F. T. *Gas Burner Construction* 62

Andrews, G. E. and Aubert, F. B. *Control Devices* 174

Andrews, R. S. *Brown Coal—Pressure Gasification for Town Gas Production in Victoria;* Barrow, G. E. *Brown Coal; —Construction of High-Pressure Gas Pipeline in Victoria* 200

Antweiler, J. C. See Cottingham, P. L.

A-P Controls Corp. See Heiser, F. F.

Appel, H. R. See Berger, C. V.

Applegate, F. B. *Mechanical Engineering — The Choice, Design, Characteristics and Maintenance of Centrifugal Pumps* 78

Araki, S. *Automatic Control of Calorific Value of Town Gas* 26

Archbold, M. J. *Commonwealth Edison Company Installs Third Unit at State Line* 58

Arden, T. V. *Laboratory Applications of Ion Exchange Resins: Industrial Developments* 208; 236

Armon, W. J. See Lamar, J. E.

Armour, J. D. *Continuous Annealing with Carbon Restoration* 104

Armstrong, F. E. See Watkins, J. W.

Armstrong, G. T. Goldstein, J. M. and Roberts, D. E. *Liquid-Vapor Phase Equilibrium in Solutions of Oxygen and Nitrogen at Pressures Below One Atmosphere* 55

Arnold, J. C. *What El Paso Natural Learned About Gas-Turbine Maintenance* 10

Arnold, J. H. *Production of Synthesis Gas* 201

Arnold, J. R. See Glayton, G. D.

Arnold, M. L. *Pipe Sizing Methods for Plant and Field Gas Lines* 48

Aronofsky, J. S. and Porter, J. D. *Unsteady Radial Flow of Gas Through Porous Media — Variable Viscosity and Compressibility* 115

Aroyan, H. J. and Wilkes, J. B. *Process of Producing Phthalic Acids* 95

Arps, J. J., and Roberts, T. G. *The Effect of The Relative Permeability Ratio, The Oil Gravity, and The Solution Gas-Oil Ratio on The Primary Recovery From A Depletion Type Reservoir* 12

Askew, J., Jr. and Cable, L. G. *A Practical Approach To The Measurement of Full Well Stream Gas* 11

Ateliers des Charmilles S. A. See Gallusser, H.

Atherton, G. H. See Corder, S. E.

Atkins, E. R. Jr. *Radiation Logging; What It is and What It Can Do For You* 204

Atlantic Refining Co. See Whorton, L. P.
Atomic Energy Commission, U. S. *Chemical Processing and Equipment* 172
Aubert, F. B. See Andrews, G. E.
Austin, W. F. *Forced Flow Air Heating and Water Heating Furnace* 102
Austrian Association Gas and Water Industries *Experience In The Field of Utilization of Rubber Joints For Gas Pipelines* 20
Ayres, E. *The Importance of Fuel Research* 101

B

Babbitt, J. D. *The Movement of Moisture Through Solids* 119
Bach, N. G. See Alexander, W.
Backensto, E. B., Drew, R. D. and Stapleford, C. C. *High Temperature Hydrogen Sulfide Corrosion* 79; *—Three Ways To Fight H_2S Corrosion* 119
Bacon, R. A. See Watt, Jr. R.
Badger Manufacturing Co. See Newton, R. H.

SUBJECT INDEX

A

ABSORPTION
- Absorption of carbon dioxide by carbonate solutions 96
- Absorption refrigeration machines 40
- Graphical solution for multicomponent absorption 109
- Rates of, carbon dioxide in amine absorbents 55
- Removing selected components by absorption 109
- Small gas samples, analysis by absorbents 207

ADSORPTION
- Adsorbent held in horizontal bags 56
- Charcoal adsorption equilibria for light hydrocarbons 75
- Coal; sorption capacity for methane 24
- Ethyl sulfide and thiophene sorption heat on platinum 235
- Gas dehydrating 109
- Gas separation by fluidized char 211
- Gasoline plants; importance to distribution 110
- Heavy hydrocarbons in natural gas 133
- Hydrocarbons separated by continuous regenerative adsorption 28
- Moisture-adsorbent in sectors of rotating vertical cylinder 110
- Pure hydrocarbons up to C_4 on activated charcoal 133
- New solid adsorbents techniques improve conditioning 178
- Sorption by coal of methane 7
- Sulfur compounds removed by silica gel 227
- Water coverage on silica gel 235
- Water sorption and reactivation of silica, alumina and $CaSO_4$ 136

ANALYSIS & TESTING
- *General Materials*
- Coal
  - Detailed studies by X-ray diffraction & infrared on coal nucleus 32
  - Infrared studies of coal 74
  - Thermal analysis of coal, quartz and clay 33
- Gases
  - Analysis of smog 22
  - Combustible gas alarm system 170
  - Control and measurement of odor 64
  - Inorganic analysis since 1932 240
  - Ozone in Los Angeles atmosphere 151
  - Sampling for a continuous supply of gas to analyzer 54
  - Symposium on odor; ASTM D-22 Atmospheric Sampling & Analysis 16
  - Titrilog in monitoring air contaminants 150
- Petroleum
  - Adduct formation in hydrocarbon separation processes 76
  - Ash in crude oil and products 150
  - Efficiency-rating system in refinery laboratory 54
  - Fractionating processes for hydrocarbons; API Research Proj. 6 15
  - Iron in oil as corrosion control criterion 187
  - Lubricating oil additives 208
  - Prediction of flash points, naphtha & gas-oil 136
  - Tests for liquefied fuel gases in Germany 134
  - Trace metals in oils by wet ashing 54
- Tar
  - Recovery of dry oil-gas tar 7
  - Specific gravity-temperature relationships of coal tar 8
- *Particular Methods*
- Carbon Determination
  - Isotopic carbon and hydrogen in organic compounds 235
  - Particulate carbon content by radioactivity 15
  - Total carbon by wet-dry combustion 32
- Carbon Dioxide Determination
  - Application of automatic analyzers in steel mills 37
  - Hydrogenation of carbon monoxide and dioxide 167
  - Recovering carbon dioxide by potassium carbonate solution 117
  - Vapor pressure of gas in saturated liquids 93
- Carbon Monoxide Determination
  - Iron carbonyl in commercial carbon monoxide 15
  - Methods for carbon monoxide, Bureau of Mines 53
  - NBS colorimetric indicating gel for CO in air 111
  - Spectra of chemisorbed CO 94
- Coal Methods
  - Ash
    - Ash-forming matter in coal; significance of lab tests 32
    - Ash reduction by various treatments 85
  - Sintering temperature of fly-ash 176
  - Moisture
    - Salts for static control of humidity 34
  - Sulfur
    - Organic sulfur in coal 107
  - Ultimate
    - Carbon and hydrogen, microdetermination in organic compounds 32
    - Oxygen by heating with excess strontium and graphite 16
  - Volatiles
    - Detecting course of degasification 25
- Dust Determination
  - Removal of dust by electrical and centrifugal gas treating 145
- Halogens Determination
  - Chlorine in coal; occurrence and behavior 125
- Hydrocarbon Methods
  - Heavy hydrocarbons
    - Carbon atom type analysis by selective hydrogenation 66
    - High boiling paraffins in polluted water 93
  - Naphthenes in gasoline by refractivity 151
  - Light hydrocarbons
    - Analyzing soil samples and well cores 234
    - Gasoline true vapor pressure 74
    - Gilsonite chromatographic separation 114
    - Urea-hydrocarbon adducts 76
  - Ethylene
    - Ethylene unsaturation by periodic acid 150
  - Methane
    - Infrared studies of preflame reactions of butane 103
    - Oxidation of paraffins by copper oxide 167
  - Olefins
    - Cyclopentadiene by mass spectrometer 187
  - Propane
    - Adsorption of C_1 to C_4 hydrocarbons on activiated charcoal 133
    - Charcoal weight test, hydrocarbons in natural gas 133
    - Specifications for liquefied fuel gases 134
- Hydrogen Determination
  - Hydrogen in gases by dew point 37
  - Micro amounts of hydrogen by vapor pressure 187
- Hydrogen Cyanide Determination
  - Detector papers indicate HCN in atmosphere 208
  - HCN hydrolyzed with water vapor on sulfide catalysts 145
- Hydrogen Sulfide Determination
  - Complexometric determination of sulfide 33
  - Removing acidic components with caustic 227
  - Vaporization equilibrium constants for H_2S 115
- Moisture Determination
  - Air of controlled relative humidity for hygrometer calibration 213
  - Automatic method for water vapor in gas streams 208
  - Water by electrolytic conductivity 179
  - Computer for water content of gases 147
  - Modification for relative air humidity 18
  - Moisture movement in solids 119
- Nitrogen Determination
  - Colorimetric for primary aliphatic amines 132
- Nitrogen Oxides Determination
  - Ultraviolet absorption determination of nitrogen dioxide 16
- Organic Sulfur Methods
  - Carbonyl Sulfide
    - Amines with carbon disulfide as analytical methods 150
    - Carbonyl sulfide refinery gases 133

Reactions, carbon and S 166
Mercaptans
Sulfur compounds in a crude oil range 0° to 100° C. 234
Thiophenes
Thiophene in virgin petroleum 234
Oxygen Determination
Direct oxygen in organic compounds 208
Dissolved oxygen in water 114
Colorimetric, oxygen in hydrocarbon gases 74
Identification of ozone 151
Oxygen content of flue gas 74
Oxygen groups on carbon black 114
Oxygen by heating with strontium oxide and graphite 16
Paramagnetic oxygen meter 166
Phenols Determination
Alkyl phenol mixtures by infrared 53
Sulfur Determination
Effect of aging solutions of barium chloride 134
Ethylenediaminetetraacetate method for sulfate 17
Spectrophotometric determination of tetrathionate 33
Sulfur by wet combustion 93
Coal sulfur, bromine water unnecessary 207
Sulfur Oxides Determination
Oxidimetric methods for sulphite 17
Sulfur trioxide in gases 151
Water
Adsorbed water by nuclear resonance 235
Continuous, automatic water recorder 119
Mine Safety Esso instrument for water in gas 208
Techniques
Absorption
Hydrocarbons in natural gas extracted 133
Chromatography
Adsorption with fractionation in absorbed phase and in liquid phase 73
Bibliography of vapor-phase chromatography 150
Chromatography for process control 233
Chromatographic technique by two columns 233
Gas chromatography techniques 216
Composition of vertical retort liquor 34
Gas-liquid chromatography 133
Gases by gas adsorption chromatography 233
Helium as mobile phase in gas chromatography 93
Hydrocarbon fraction of gilsonite 114
Exchange applications to organic investigation 135
Mass spectrometer analysis of chromatography fractions 166
Precision coulometric titrator 32
Vapor-phase chromatography techniques 54
Distillation
Colorado shale-oil bases, fractionation 165
Distillation literature: index and abstracts 156
Electron Microscope
Summary on electron microscopy, 1955 133
Equipment
Automatic process-stream analyzers 166
Instrumental chemical analysis 40
A molybdenum-wound laboratory tube furnace 213
Gases
Analysis of very small gas samples 207
Analyzing mine atmospheres 74
Automatic carbon dioxide, oxygen, and combustibles analyzers 37
Catalytic combustion type analyzer 186
Continuous control of CO_2 53
Control of air pollution 140
Evaporation losses by vapor pressure 53
Gas specific gravity measuring devices 191
Gases in metals 187
Hydrocarbons, ozone "oxidant" methods, and pollutant identification 143
New instruments for hydrocarbon mixtures 151
Sampling continuously proportional amount of gas 54
Sampling purifying and feeding gas to analyzer 54
pH Determination
Chromium and vanadium in cracking catalyst 233
Indicator for titration of calcium 166
Infrared Methods
Analysis of alkyl phenol mixtures 53
Analyzing earth samples by infrared 128
Carbon monoxide and carbon dioxide in region from 4 to 6 microns 15
Continuous infrared analyzers for process control 187
Developments in infrared spectroscopy 133
Gaseous organic substances in atmosphere 166
Identification of organic compounds manual 80
Infrared spectrum of benzene-d_6 151
Infrared spectra of graphitic oxide 75
Spectra of 66 gases and vapors 233
Spectral studies on chemical composition 74
Mass Spectrometer Methods
Nickel cracking catalyst 187
Nuclear magnetic resonance spectroscopy technique 134
Review of mass spectrometry 134
Unsaturates in petroleum naphthas 234
Radio Activity Methods
Costs of radiation and radioisotope laboratories 136
Hot-atom chemistry of carbon 136
Oil industry largest user of radioisotopes 93
Radioactive materials used underground 50
Radioisotopes for research 116
Tracer materials in oil field 228
Uses of radioactive isotopes in petroleum refining 152
Sampling
Accuracy of sampling coals 53
Automatic sampling in eliminating inaccuracies 127
Care and handling of samples 127
Meter in sampling under reduced pressure 239
Spectroscopy
Advances in emission spectroscopy 115
Analysis of lubricating oils 134
Metals in organic products 234
Precision of indirect spectrophotometry 17
Multichannel flame spectrometer 92
Spectrochemical analysis of silicon 187
Wear in engines and compressors by emission spectrograph 207
Standards
Precision of laboratory analyses 93
Sampling mixed coals; tests of accuracy 53
Statistical Methods
Operations research methods 216
Surface Area
Differential thermal analysis in fuel 33
Pore volume of solid catalysts 56
Ultrasonic Methods
Structural rings calculated from sound velocity 115
X-Ray Methods
Automatic recording microdensitometer 93
Cobalt, nickel, and iron alloys by x-ray diffraction 208
Review of x-ray diffraction during 1955 135
X-ray Geiger counter for scale analysis 93
"Sweeping-Beam" x-ray analysis 135
X-ray studies of coal 32
APPLIANCES
Adjustment
Interchangeability of high-btu oil gases and natural gases 44
Design
Commercial appliance thermostats 83
Development of gas appliances 196
Electrostatic spray painting of water-heater jackets 82
Explosion reliefs for industrial drying ovens 64
Packaging of water heaters in corrugated cartons 82
Sealing means 158
Stove-fuel supply system 158
Air Conditioning
Air conditioning load has spurred electric heating load 2
Basic thermodynamics of heating and cooling 158
Deodorant-sterilizer for air 102

Existing warm-air system air capacity to do cooling 158
For gas air conditioners available 122
Gas air conditioning development 173
Hot-air engine is prime mover for air conditioners 174
Indirect evaporative cooler installations and performance 141
Installed Servel and Carrier absorption systems 194
Load requirements, intermittently heated buildings 158
New Servel air conditioner XFC-96-G placed for field tests 1
Small commercial air conditioning opportunity 173
Southern states gas air conditioning, statistical study 141
Burners
Atom and radical concentrations in flames 123
Burner for water-wall furnace 102
Burner ignition apparatus and valve 62
Ceramic radiant broiler burner 142
Dirt-free engineering design 122
Dual-band type gas burner 174
Effect of burner-tip temperature on flashback 123
Electric pilot-flame igniter 142
Ethylene inhibition at rich blow-off limit 123
Flame blowoff in rectangular burners 123
Flashback-proof gas burner 142
Gas burner construction 62
Gas burner 174
Gas-oil conversion burner tube 142
Location of "Schlieren image" 124
Open flame heating unit 62
Radiant heating for industrial applications 175
Rotary gas burner 142
Single-port gas burner and flame deflector 174
Tapered bore gas burners 174
Top burner construction 142
Cookers
Combination gas and electrical fryer 174
Combination stove and broiler 196
Commercial heavy-duty uniform heat top ranges 218
Commercial open top ranges 62
Cooking range 62
Cooking and heating appliances in USA 240
Deep fat fryer 63
Gas range drawer structure 196
Gas stove 174
LP gas range improvement 2
Multipurpose cooker 174
Tem-trol top burner of Roper ranges 2
Separate ovens 63
Top burner assembly for gas stove 195
Dryers
Clothes dryer, rotating-drum type with electric heater 196
Demonstrations key to dryer sales 22
Keep clothes dryer rules; potential trouble spots 42
Sales of home laundry appliances 63
Heaters
Space Heaters
Causes for service of gas heating 63
Floor furnace 143
Forced air combustion heater 62
Forced air recirculation floor furnace 2
Forced flow air and water heating 102
Gas furnace and controls 103
Liquid heating and circulating 175
Oil burning floor furnace 175
Oil burning furnace and control 219
Overhead fuel burning heaters 195
Packaged heat pump for air conditioning 142
Reverse-cycle refrigeration produces hot water or warm air 158
Sealed heater venting system 175
Schwank units "Mastertherm" units for industrial process 219
Space heater 62
Space heater for open gas burner 175
Warm air furnaces 196
Water heaters
Analysis of water heating process 196
Design on service hot water units 82
Design, service hot water systems 42; 103
Gas-fired water heater 196
Hot water in Howard Johnson restaurants 103
Table-top water heater 83
Storage water heater 103
Ignition
Automatic gas cut-offs of thermocouple type 142
Automatic ignition mechanism 122
Automatic ignition and control mechanism for gas burners 195
Burner control apparatus 1; 102; 157
Burner safety control 174
Burner safety control system 195
Combustion safeguard apparatus 157
Control apparatus for burning apparatus 219
Control devices 174
Control and electric ignition for stoves 62
Control for gaseous fuel burners 62
Control system 83
Electric igniter 174
Electric ignition device for gaseous fuel 196
Flame failure and ignition control 62
Gas burner control 62
Gas burner control system 62; 174
Gas-fired heating system 122
Gas flow control 122
Gas lighter control unit 195
Gas-oven temperature regulator 1
Gas pilot arrangement 142
Gas regulating device 62
Hydro-pneumatic pressure control apparatus 219
Igniter systems for gas ranges 82
Lighters for gas burners 196
Oven control 157
Over-temperature shut-off and flame safety valve 195
Pilot burner and igniter 219
Pilots, commercial gas cooking equipment 102
Pilots provide most serious service 219
Recirculating pilot and burner 157
Runner lighter for gas 102
Safety burner control apparatus 2
Safety control means for gas appliances 142
Safety device for appliances 62
Safety gas cocks 174
Shut-off and control 122
Shut-off valve system 62
Surface-type burner control 102
System of time controlled air and fuel 122
Thermostat and gas shut-off 157
Incinerators
Domestic gas-fired incinerator, after-burner in flue 196
Gas-fired domestic incinerator a desired appliance 175
Manufacture
Appliance show record sales in 1955 42
GAMA total shipments of gas-fired appliances 42
Whirlpool-Seeger Corp. automation and training program 142
Refrigerators
Concentration of absorbent solution 102
Cooler construction in a hot-gas engine 219
Refrigeration evaporators at different temperatures 41
Refrigerators in utility gas marketing 158
Evaporators in inert gas types 41
Vacuum-type absorption refrigeration system 63
Standards
Change appliance requirements and merchandising 102
Cost of electricity and liquefied petroleum gas 22
Performance of wall heater 63
Plant insures safety of appliances 195
Salesmen's compensation 102
Temperature distribution and capacity rating of wall heater 22
Underwriters' Laboratories testing equipment 123
Ventilation
Burner air for combustion, ventilation, and dilution of flue gases 22
Exhaust-hood tests and design data 83
Field survey of gas appliance venting 82
Kitchen stove ventilator 158
Valves

Control valve mechanism for fluid fuel burning appliances 219
Double outlet valve for controlling gas 195
Dual gas valves 157
Gas range burner-valve handle protector 219
Gas valves 2; 83; 219
Sonic control for burners 219
Thermoelectric safety shut-off device 219
Valves 219

B

BUREAU OF MINES
Analyzing mine atmospheres by Haldane-type apparatus 74
Coal as source of electrode carbon 85
Flow of natural gas through experimental pipelines 182
Gasification of lignite in commercial-scale pilot plant 68
Hydrofining thermally cracked shale-oil naphtha 206
LP-G sales during 1955 reported 227
Method for refining shale oil 207
Minerals year-book 100
Oil recoveries for solution-gas-drive reservoirs 129
Organic acids from Colorado oil shale 207
Oxygen gasification of coal 177
Performance of *Girbotol* purification plant 87
Petroleum and natural-gas research 1953 14
Purification of synthesis gas 200
Recovery of tar acids 35

C

CARBON BLACK
Manufacture
Carbon black from carbon monoxide 9
Hard carbon black pellets 9
Methods of carbon black separation 9
Recovery as a rubber-carbon black mixture 9
Properties
Adsorption of molecules on carbon, ammonia and methylamine 75
Carbon formation in flames 3
Oxygen groups on carbon surfaces 114

CARBONIZATION
Coal Chemicals
British coal, source of fuels and chemical products 144
Chemical and other uses 106
Coking of pitch 86
Full-scale plant for continuously recovering benzole 221
Improved yields by adding pitch, wax, and stearine 86
Processing coal before combustion 84
Recovery of crude light oil 46
Coal Preparation
Burstlein's method of grinding, blending and carbonizing for uniform coke 222
Coal extraction solvent, carbonization and temperature 201
Lower-rank coals for gas-making 199
Coke Formation
Carbonization of Wyoming noncoking coals 25
Carbonizing pulverized coal in suspension 144
Coal extraction, extracts and coking behavior 221
Coke by *Grancole* process 106
Coking coals' plastic region visible to X-rays 46
Degasification and expansion apparatus 25
Durain char reblended with clarain and vitrain 177
Fluidity-time slope related to absolute temperature 106
Graphite coke manufacture 85
Mining, transport by pipeline, and processing of gilsonite 223
"*Coal Logs*" process in England 85
Gilsonite, raw material for coke and gasoline 223
Solid smokeless fuels in Britain 221
Equipment
Convert subbituminous coal at 1400° F. to char 198
Coke ovens as gas plant 66
Collin AG coke-oven "full stream reversing" system 176
Controlled-flow oven with sole-flue and regenerator subdivided 66
Dense coke by retarding froth 144
Development of Russian coke-oven industry 8
Fresh coal mixed in transfer-line with hot char 176
Pilot coke oven for coal blends and coke quality 198
Service life of refractories 40
Solar energy coking 201
Wilputte underjet ovens at Mauritz 125
Heat Transfer Data
Carrier gas carbonization by Rochdale process 176
Producing high-purity graphite 105
Lignite: Peat
Retort for carbonizing sawdust 88
Low Temperature
Char in place of low-volatile coal in metallurgical coke 144
Coking coal and char or coke breeze preheated, fed to retort 45

COAL
Analysis
Ash
Accuracy of sampling coals 53
Ash-forming matter in coal 32
Coal minerals importance to boiler design 145
Cyclone furnaces for boiler heating 199
Dilatometer for sintering of fly-ash 176
Germanium in coal, soil and rock 15
Moisture
Fine structure and heat of moistening 222
Ultimate
Rapid simple micro-combustion 92
Classification
Conversion of vegetable matter to solid fuels 107
Differential thermal analysis in fuel 33
Variation in coal rank by thermal-metamorphism 107
Cleaning
Coal source of electrode carbon 85
Desulfurizing by hydrogen 66
Conservation
Coal charges from existing reserves and ranges of coals 221
Constitution
Activated diffusion of gases in coal 66
Breaking strength, elastic, and rheological properties of coal 66
British coal grindability with Hardgrove mill 159
Calorific value predicted from ring condensation index 24
Coal extraction, extracts and coking behavior 221
Coal extraction solvents; carbonization 201
Coal sorption capacity for methane 24
Coal structure and refractivity, volatile matter and density 24
Coal by X-ray diffraction and infrared 32
Fine structure of coal and molecular sieves 222
Organic sulfur and hydrogen bonding in coal 107
Origin of lignin in formation of coal 68
Sorption by coal of methane 7
Spectral studies on chemical composition 74
Surface area of coal 85
Handling
Fuel handling costs steam-electric stations 84
Mining, transport by pipeline, and processing of gilsonite 223
Plant built to process gilsonite 223
Hydrogenation
Hydrogasification of oils and coal 126
Experimental hydrogenation of coal up to 50 atmospheres for 500 Btu gas 223
Survey of year's literature on hydrogenation 31
Three-step hydrogenation-coking 106
Uncatalyzed coal hydrogenolysis 6
Mining
Methane drainage in coal mines 85
Properties
Carbonizing
Blast-furnace cokes prepared from various blends 25
Carbonization of Wyoming noncoking coals 25
Char in place of low-volatile coal in metallurgical coke 144
Coking coal and char or coke breeze, preheated, fed to retort 45
Coking coals in plastic region visible to X-rays 46
Convert subbituminous coal at 1400°F. to char 198
Degasification and expansion apparatus 25

Dense coke by retarding froth 144
Durain char reblended in high-temperature carbonization 177
Improving quality of coke from diminishing supply of coking coals 221
Pilot coke oven for coal blends and coke quality 198
Prevent agglomeration of coking coals by coating 67
Rendering carbon materials non-agglomerative 67
Solid smokeless fuels from non-coking coal 221
Oxidation
Nitric acid oxidation 106
Changes in properties upon gasification with carbon dioxide 105
Plasticity
Contraction and expansion by automatic plastometer plunger 25
Differential thermograms of coal 107
Fluidity-time slope related to absolute temperature 106
Reactivity
Physico-chemical problems in coal 125
Pulverization
Burstlein's grinding, blending for uniform coke 222
Grindability indices of 150 British coals 222
Mechanical properties of coal 66
Pulverizing solids in fluid suspension 222
Statistics
Atomic energy is large coal consuming industry 159
Utilization
Chemical and other process uses 106
Coal purification, 15 U.S. coals 85
Colorimetric method for germanium with phenylfluorone 15
COKE
Properties
Blast-furnace cokes prepared from various blends 25
Coke by *Grancole* process 106
Desulfurizing solid carbon materials by hydrogen 66
Graphite coke 85
Solid smokeless fuels in Britain in the next 10-15 years 221
X-rays of carbon; hot-face curvature and coke-fissuring 46
COMBUSTION
Air Pollution
Analysis of smog 22
API program of research on air pollution 143
Basic statistics of Los Angeles area 42
Control of air pollution 140
Control methods for automobile exhaust 43
Direction of air movement in Los Angeles Basin 43
Eliminate unburned exhaust gas 63
High-temperature dust filtration 138
Houdry catalytic exhaust converters 43
House of Commons bill to reduce air pollution 23
Infrared monitoring of organic substances 166
Los Angeles refiners halved the pollutants 43
Meteorological and chemical aspects of smog 5
Oxidation of waste gases 197

Charts for vapor-liquid equilibrium for mixtures of hydrocarbon 71
Equilibrium comprising all principal C_3 hydrocarbons and hydrogen 152
Ethane-ethylene-acetylene system 34
Low-temperature phase-equilibrium, oxygen-nitrogen 55
Principles of chemical equilibrium 156
P.V.T. date of reservoir fluids 228
State of gases by shock wave 55
Vapor-liquid equilibrium diagrams 94
Gases
Lennard-Jones and Devonshire theory refined 94
Limitations of equations of state 94
Heat Capacity
Estimation of heat capacities 33
Heat capacities at bubble point 55
Heat of vaporization
Flash points function of mole fraction, molecular weight and latent heat 136
Vapor yields on flashing 186
Hydrocarbons
General
"Handbook of Hydrocarbons" 40
"Progress in Organic Chemistry 60
"Properties of lighter Hydrocarbons, Hydrogen Sulfide, and Carbon Dioxide" 60
Acetylene
Acetylene from mixtures by solvent partially miscible with water 167
Origin of C_2 radical in hydrocarbon flames 43
Selective removal by contact with potassium hydroxide 167
Aromatics
Physical properties, cyclic compounds 120

Vapor-liquid equilibrium for mixtures of aromatic naphthenic hydrocarbons 189
Butane
Infrared study pre-flame reactions of butane and oxygen 103
Oxidation of isobutane 2
Ethane
Decomposition of C_2H_6-CD_4 mixtures 153
Ethylene
Aldehyde from ethylene and synthesis gas 137
Gamma radiation on ethylene-oxygen solutions 209
Reaction between ethylene and deuterium 135
Rich blow-off limits of ethylene flames 3
Silver catalysts for ethylene oxide 137
Vapor pressure of ethylene 152
Methane
Adding formaldehyde to reaction of methane and oxygen 23
Burning velocities and pressure effect 143
Diffusion coefficients in hydrocarbon gas phase 33
Flame of ozone in mixtures of methane and air 12
Viscosities of methane-carbon dioxide and ethylene-argon 209
Higher Hydrocarbons
Cool flames, dynamic studies 159
Neutron bombardment in selective rupture of bonds 137
Oxidation of paraffins by copper oxide 167
Thermodynamic properties binary alkane mixtures 236
Urea-hydrocarbon adducts 76
Propane
Fuel gas by pressure hydro-gasification 223
Propane-air flames, burning velocity 158
Propane to nitroparaffins 76
Splitting of hydrocarbons to form ethylene 210

Hydrogen
Burner in fuels with high hydrogen 83
Compressibility chart up to 1600 psia to 600°F. 115
Viscosity, thermal conductivity, specific heat, and density of hydrogen 115

Ion-Exchange Agents
Applications of ion-exchange resins 115
Exchange properties of ion-exchange resins 167
Industrial applications of ion-exchange 208
Ion-exchange resins, industrial developments 236
Water purification, catalysis, and desalting 94

Kinetics
Carbon dioxide with carbon, range 700-1400°C. 145
Engineers, kinetics and reactor design 216
Gasification of carbon 6
Kinetics of carbon oxidation 55
Kinetics of the steam-carbon reaction 125
Mechanism of toluene decomposition 237

Metals
British research on nuclear metals 24
Corrosion, exhaust-valve steels 99
Effect of surface films on friction 171
Emissivities and absorptivities of surfaces 75
Gases in metals 187
Nonmanual welding 100
Rare earths, properties and applications 172

Nitrogen
Dissociation energy of nitrogen 55

Nuclear
Mathematics of physics and chemistry 100
Theory of chemical bond 100

Oxygen
Low-temperature phase-equilibrium, oxygen-nitrogen 55
Solubility of oxygen in sea-water 18
Technology of hydrogen peroxide 100

Permeability
Additions to improve soil for construction 36
Apparatus for relative permeability 112
Calculating average oil saturation of formation 183
Darcy equation, flow through sandstones 188
Directional permeability of sandstones 29
Flow of gases through porous media 216
Gas permeation through membranes 236
"Hydraulic radius" in porous media 29
Miscible fluis displacement in a porous medium 225
Network model of porous media 205
Nylon, polyethylene, *saran* and acetate permeability 167
Permeability of polymer films to gases 55
Physical theory of capillary flow 188
Pore-size distribution apparatus 183
Pore volume of solid catalysts 56
Pressure distributions in tilted aquifiers 183
Wettability on behavior of fluids 188

Solubility
Binary solution systems of water with phenol 17
Dissolved gases in water 188
Dissolved oxygen in water 114
Effect of dissolved gases on surface tension 56
Measuring density of fluid 94
Small weight, volume, and density changes 37
Solute transfer to liquid drops 75

Sulfur Compounds
Carbon Disulfide
Carbon disulfide by heating sulfur in two stages 95
Manufacture of carbonyl sulfide 76
Reaction of carbon disulfide with amines 150
Removing from liquefied petroleum gases 76
Hydrogen sulfide
Burning velocities of hydrogen sulfide 2
Equilibrium constants of H_2S 115
High-temperature hydrogen sulfide corrosion 171
H_2S decreases the blow-off limit 23
Permeability of polymer films to H_2S 167
Preparing hydrogen persulfides 236
Thiophene
Impurities in thiophene removed 168
Properties of 2-methylthiophene 168
Thiophene, heat and free energy of formation 34
Sulfur Dioxide
Removal of sulfur dioxide 65
SO_2 by submerged combustion 77
Sulphur trioxide in gases 151

Tars
Coal tar and brown coal tar, binary solution system of water with phenol 17
Specific gravity-temperature of coal tar 8

Thermal Conductivity
Conductivity organic liquids 116
Thermal diffusivity of metals 300° to 1050°F. 210

Thermodynamic
Activity coefficient of vapors 33
Heats of combustion of organic nitrogen 236
Low-temperature research 116
Straight-line relation, molar oxygen balance and molar heat of combustion 236
Thermochemistry: heats of reaction 100
Thermodynamics for process evaluation 78

Toxicity
Plant safety and design 118
Carcinogenic factors in city smoke 143
Engineering control of occupational hazards 21
Methods for carbon monoxide 53

Vapor Pressure
Equilibrium constants for H_2S to 212.7°F. and 1000 psia 115
Salts for control of humidity 34
True vapor pressures of natural gasolines 74

Viscosity
Low-shear capillary viscometer 56
"Mass transfer — transport properties" including viscosity 60
Predicting viscosity of mixtures of hydrogen 115
Radial unsteady flow of gases 115

Viscosities of methane-carbon dioxide and ethylene-carbon dioxide 209
Viscosity of liquid hydrocarbons 17
Water
Calculating water content of gases 147
Corrosion in pre-boiler systems of utility boiler-turbine units 154
Equilibrium moisture content of natural gases 49
Short cycle dry-desiccant adsorption unit for well-head gas 146
Water sorption of silica gel, alumina, calcium sulfate 136

PURIFICATION
Ammonia Removal
Concentrated aqua ammonia by direct washing 5
Benzene
Recovery of crude light oil 46
Carbon Dioxide Removal
Absorption of carbon dioxide by carbonate solutions 96
Complete purification in Rectisol process 87
Efficiency with absorption of carbon dioxide 211
Nitrogen from flue gases 126
Rates of carbon dioxide in amine absorbents 55
Recovering CO_2 by potassium carbonate 117
Waste-gas heat exchanger solidifies CO_2
Carbon Monoxide Removal
CO and CO_2 removed from commercial hydrogen 160
Raw hydrogen gas mixture with carbon monoxide contaminants hydrogenated 223
Dehydration
Continuous separation of gases by fluidized adsorbent 110
Distillation recovery of ethylene glycol 110
Dry-desiccant adsorption for well-head gas 135; 146
Granular desiccant regenerated by sidestream 110
High-capacity solid adsorbants, and glycols 47; 110
Removing moisture continuously by granular desiccant 110
Solid desiccant gas dehydration 146
Solid adsorbant in horizontal bags 56
Water sorption of silica-gel, alumina 136
Dust Removal
Ash on electrodes of precipitators made conductive 160
Blow-gas dust from C.W.G. plants 199
Carbon black is recovered with unvulcanized rubber 9
Carbon black separation 9
Combined electrical and centrifugal gas treating 145
Cyclone-type dust collectors 35
Electrostatic gas cleaning 199
Galusha producer with Whessoe gas-cleaning plant 69
Gas scrubber design for flyash 77
High-temperature dust filtration 138
Mist extraction, general principles 97
Particulate matter removal and gas purification 47
Power equipment for electrostatic flyash collection 23
Principal dust separating equipment 97
Removal of dust from product gases 46
Separating particles from stream 160
Sonic dust-extraction processes 97
Washer tile-beds removing dust 118
Gases, general
Absorbed gases removed by air 36
Bibliography on gas conditioning 162
Gum deposition in appliances from old deposits 160
Hydrocarbon Removal
Field processing by cyclone separators 109
Field stabilizers of separator liquids reduced loss 27
Hydrocarbons (low-boiling) obtained by adsorption 28
Well-stream sampling technique, recommended procedure 27
Hydrogen Cyanide Removal
Absorption processes for recovery of CN 7
Purification of hydrogen sulfide 145
Hydrogen Sulfide Removal
Catalytic Processes
Conversion of H_2S to free sulfur 201
Sulfur from sour hydrocarbon gases 146
Dry (Oxide) Processes
Burnt oxide in purification 200
Control of deep purifiers 68
Gastechnik purification by iron oxide pellets 67
Liquid Reactants
Amine process for removing acid gases 10
Amine unit design and operation 10
Economics in disposal of oilfield wastes 52
Ferrox process for H_2S from air 10
Flue-gases to strip H_2S from foul water 52
H_2S or HCN removed preferentially from gas containing CO_2 161
Hydrogen sulfide, oxygen, dust, carbon dioxide, and carbonyl sulfide from synthesis gas 200
Removing hydrogen sulfide and water 227
Semi-commercial amine purification 87
Submerged combustion of H_2S yields sulfur 51
Vacuum carbonate process for purification 87
Why diethanolamine breaks down 199
Nitrogen Removal
Nitrogen, separated, expanded and used to cool the condenser 11
Separating nitrogen from raw natural gas 164
Organic Sulfur Removal
Carbonyl sulfide in liquefied petroleum gases 76
Complete purification in Rectisol process 87
Dry process for recovery of sulfur compounds 161
Removing carbonyl sulfide from gases 198
Spectrophotometric method, carbonyl sulfide in gases 133
Sulfur compounds by adsorption on silica gel 227
Plant Wastes Purification
API activities since 1929 166
Disposal of gas works effluents 97
Effluent disposal system 127
Middle east crudes, sulfur recovery plant 72
Model waste-disposal system 32
Refinery has satisfied requirements by reuse of water 169
Removal of sulfur dioxide 65
Ridding waters of caustic and sulfides 204
Socony's Casper refinery evaporation pond 77
Toxicity of effluents and BOD 36
Trade wastes in municipal sewage plants 36
Waste products from nuclear fission 77
Tar Removal
Cooling crude gas by liquor sprays 160
Removing tars from cracked gas 8
Tar recovered dry in wash-box at 250°-300°F. 8

PYROLYSIS
Coal
Assay to determine yields and properties of products 25
Kinetics of carbonization in plastic state 106
Structure and evolution of plastic region visible to X-rays 46
Higher Hydrocarbons
Aspects of thermal vapor-phase cracking 26
Ethylene scheme methods 153
High-Btu oil gas plant, Sydney, Australia 108
Hydrocarbon fraction of gilsonite 114
Operation for oil-gas machine 86
Product distribution in hydrocarbon pyrolysis 26
Steam-pyrolysis of petroleum 95
Synthesis gases by oxidative cracking of hydrocarbons in engine 161
Natural Gas
Cracking heater of refractory tiles with passages and flues 71
Decomposition of C_2H_6-CD_4 mechanisms 153
Endothermic products by sensible heat recovered cyclically in regenerator 211
Exothermic reaction of methane and oxygen 177
Gas and oxygen reaction in annulus burner 201
Hydrocarbons contracted with alkali-metal carbonates 201

Partial oxidation of methane by free oxygen 160
Wales Gas Board reforming plant at coal mines 161
Oil Shales
Distillation scheme claims improvements in preheating 114
Illinois oil shales, Fischer retort assay 131
Pyrolysis of crude shale oil 26
Union Oil Co commercial-scale pilot plant 73
Propane-Butane
Designing cracking units 117
Equilibrium constants for cracking paraffins to ethylene 210
Natural gas substitutes by thermal cracking of natural gas liquids 25
Propane into superheater during make using heavy oil 86
Pyrolysis of ethane and propane to ethylene 76
PYROMETRY
Platinum resistance thermometer for low temperature 34
Protecting tube eliminates carbonization 213
Radiant energy instruments 118
Radiant heat-flux distribution at curved surfaces 221
Thermocouple of nickel-chromium-silicon 239
Thermocouple resistant to reducing atmospheres 155
Suction pyrometers with radiation shields 213

R

RESIDUALS
Ammonia
C.A.L. Plant for spent gas liquor 127
Concentrated aqua ammonia by direct washing 5
Aromatics
Coal, chemical and other process uses 106
Continuous benzol recovery 221
Recovery of crude light oil 46
Cyanogen
Absorption-desorption recovery of CN 7
Reaction between hydrocarbon, oxygen and ammonia 153
Vacuum carbonate process for recovery 87
Phenol
Binary solution systems of water with phenol 17
Composition of vertical retort liquor 34
Infrared analysis of alkyl phenol mixtures 53
Recovery of tar acids 35
Sulfur
Calcium sulfate into lime and sulfur 146
Conversion of H_2S to free sulfur 201
Purification of hydrogen sulfide 145
Submerged combustion of H_2S yields sulfur 51
Sulfur from sour hydrocarbon gases 146
Tar
Coking of pitch in shaft and coking zone 86
Contacting gas above vaporizing point of water with liquid at controlled lower temperature 8
Improved yields by adding pitch, wax, and stearine 86

S

SHALE OIL
Analysis
Fractionation of Colorado shale-oil 165
Illinois shales, Fischer retort assay 131
Relations of oil yield and specific gravity developed 114
Production
Distillation of shale with heat carrier (ceramic or metal balls) 52
Four-zone vertical retort 52
Improved preheating of shale feed 114
New Swedish shale-oil pilot unit 92
Oil-shale technology and review 92
Shale-oil industry, economic factors
Shale retorted in fluidized system 233
Union Oil Co. commercial scale pilot plant 73
Union Oil Co. shale mining and 300-ton retort 207
Refining
Hydrofining thermally cracked shale-oil naphtha 206
Organic acids from oil-shale kerogen 207
Pyrolysis of crude shale oil 26
Recycle hydrogenated shale-oil crude 185
Shale oil coked, heavier distillate hydrogenated, light fractions reformed 207
STEAM GENERATION
Fuel Economy
British research on nuclear metals 24
Combustion calculations for multiple fuels 197
Cost outlook for power 65
Economics of coal buying 175
Economics of nuclear power 24
Feed water heater contact system 78
Fuel handling costs, utility stations 84
Gradual transition to nuclear energy 44
Instrumentation and control of boilers 238
Power problems in manufacture and distribution 8
Practice of cyclone firing 199
Processing coal before combustion 84
Progress in steam generation 176
Progress on commercial nuclear reactor program 84
State Line unit No. 3 turbine on pulverized-coal-fired boiler 58
Maintenance
Boiler efficiencies: coal, oil and gas 44
Pressurized-water reactor power plant 5
Steam and power demands British gas works 108
Water Treatment
Corrosion in pre-boiler systems 154
SYNTHESIS
Acetylene
Acetylene gas from hydrocarbon by combustion 18
Acetylene selective absorption by water solvent 167
Acetylene selectively removed from mixtures with ethylene 167
Gas chromatography for separation of gases of partial methane oxidation 237
Processes—III: the production of acetylene 152
Ammonia and N_2 Fixation
Ammonia in Canada 76
Grace Chemical synthetic ammonia plant 18
Phillips Houston gas reforming and ammonia synthesis processes 116
Reaction between a hydrocarbon, oxygen, and ammonia 153
Sohio ammonia plant 95
Synthesis-gas process bolsters coal for chemical 210
Synthesizing nitrogen products from hydrocarbons 237
Aromatics
Aliphatic compounds by alumina catalyst 95
Mechanism of tolene decomposition 237
Naphthalene by dealkylation hydrogenation 237
Production of benzene from hydrocarbons 189
Separation of positional isomeric dialkylbenzenes 210
Butadiene
Butadiene industry in Texas-Louisiana area 189
Construction of two large butadiene plants in West Texas 116
Dehydrogenation of n-butane to butadiene 189
From Coal and Coke-Oven gas
Chemical raw materials in coke, gas and petroleum industries 77
From Ethylene
Carboxylic acids from olefines, carbon and water 116
Increased consumption of ethylene 237
Kellogg steam pyrolysis of ethane 76
Propionaldehyde from ethylene 137
Fischer-Tropsch Process
Carbon deposits formed by carbon monoxide on iron, cobalt and nickel catalysts 52
Catalysts for carbon monoxide hydrogenation 67
Fischer-Tropsch South African liquid fuel and organic-chemical industry 189
Hydrocarbons from carbon monoxide-hydrogen 188
Hydrogenation of carbon monoxide and dioxide 135

Isomer distribution in products of Fischer-Tropsch 31
Upgrading Fischer-Tropsch product over alumina 14
Fuel
Future of synthetic liquid and gaseous fuels 1
Research in energy release or energy conversion required in power generation or transportation 101
Hydrocarbons
Converting synthesis gas to methane over Raney catalyst 46
Natural gas hydrocarbons for petrochemicals 95
Petrochemicals in Canada on second round of expansion 237
Rupture of bonds by neutron bombardment 137
Rubber plant byproducts, isobutane 116
Hydrogenation Process
Hydrogenating Wyoming black oils 52
Hydrogenation catalyst having base chemisorbed 91
Hydrogenation of No. 2 fuel oils 91
Steel-catalyzed hydrogenation of CO 167
Sulfur-resistant catalysts for aromatics hydrogenation 152
Survey of year's literature on hydrogenation 31
From Methane
Ammonia, methanol, acetylene, oxo, Fischer-Tropsch, based on natural gas 168
Hydrogen cyanide from methane and ammonia 56
Olefins
Chemicals from natural gas in thirty-five years 153
Propane to nitroparaffins 76
Pyrolysis methods on ethylene production 153
Steam-pyrolysis of petroleum 95
Oxidation Process
Adipic acid from petroleum via cyclohexane 153
Epoxides from ethylene oxide to glycol, acrylonitrile, and ethanolamines 189
Gamma radiation on ethylene-oxygen solutions 209
Oxidation of paraffins by copper oxide 167
Phthalic acids by oxidation of xylenes 95
Silver catalysts for ethylene oxide 137
From Petroleum
Aspects of thermal vapor-phase cracking 26
Natural gas substitutes by thermal cracking of natural gas liquids 25
Philadelphia, heart of eastern chemical industry 34
Product distribution in hydrocarbon pyrolysis 26
Pyrolysis of crude shale oil 26
Phenol
Hydrocarbons heated with copper sulfate and water 237
Phenol by cumene hydroperoxides 116
Sulfur Compounds
Carbon disulfide by high-temperature in two stages 95
Carbonyl sulfide by SO_2 and CO through coke 76
Liquid NH_3 and CO_2 conversion to urea 168
Sulfur compounds petroleum as chemicals 95
Urea from aqueous ammonium cyanide 153

U

UTILIZATION
Air Conditioning
Air-conditioning thermal circuit solution by differential analyzer 218
Benefits of all-year air conditioning 195
Deodorant-sterilizer for air 102
Discomfort index to establish need for air conditioning 218
Distribution of air for year-round air conditioning 195
Forced warm-air system, capacity on cooling 158
Gas air conditioners for building summer loads 122
Gas air conditioning development 173
Graphical analysis for air conditioning 194
Hot-air combustion engine for air conditioners 174
Installed Servel and Carrier absorption systems 194
New Servel 3-ton air conditioner placed for field tests 1
Predicting weather nine months ahead 143
Progress in air conditioning load 1
Refrigeration evaporators at different temperatures 41
Small commercial air conditioning 173
Southern states gas air conditioning, statistical study 141
Temperature, humidity and odor perception 105
Testing refrigeration and air conditioning 123
Two evaporators in inert gas type cooling 41
Domestic
Clothes Drying
Ample home laundry market still open to gas dryer sales 63
Clothes dryers potential trouble spots 42
Demonstrations key to successful dryer sales 22
Incinerators
Domestic incinerator a desired household appliance 175
Gas-fired incinerator with after burner in flue-pipe 196
Cooking
Automatic controls for commercial gas cooking equipment 83
Automatic pilots for commercial gas cooking equipment 102
Built-in kitchen, working area
Commercial heavy-duty uniform heat top ranges 218
Commercial open top ranges 62
Cost of electricity and liquefied petroleum gas, Beltsville, Md. tests 22
Gas vs. electric surface cooking 174
GAMA total shipments of gas-fired appliances 42
German tests show advantages of LPG 122
LP-gas range improvement increased saleability 2
Roper ranges featuring automatic top burners 2
Separate ovens 63
House Heating
Air heating furnace 103
Appliance record sales in 1955 42
Basementless house heating 22
Causes for service of gas heating 63
Cold wall effects in ceiling-panel 198
Conventional warm-air furnace heating system 42
Courts rules on heating contractors 122
Electric heating becoming a real threat 122
Forced-flow air and water heating 102
Fuel in public housing 105
Gas appliance venting conditions 82
Gas conversion preparation of heating plant 143
Gas furnace and controls 103
Heat load calculations by thermal response 174
Heating housing projects by LP-gas 42
Intermittent heating and cooling of buildings 158
Normal degree-day figures for 335 cities 104
Oil burner to replace gas burners 124
Packaged heat pump for year-round air conditioning 142
Past decade in gas utilization equipment 63
Performance of wall heater 63
Perimeter heating in a residence 142
Principles of heat pump and limitations 175
Solar collector for heat pump 105
Supply and costs affect load development 47
Temperature distribution and capacity rating of wall heater 22
Tests insure safety of heating appliances 195
Thermodynamics of heating and cooling systems 158
Water piping and distribution design 22
Water Heating
Ascot table-top balanced-flue water heater 83
Design on service hot water 42; 82
Design service hot water systems 103
Hot water demand of Howard Johnson restaurants 103

Hot water for multi-story buildings 42
Improving recovery performance of domestic gas water heaters 196
Tankless coils, gas boilers fuel allocation 123

Motor Fuel
Engine generation of synthesis gas 44
Turbocharging two stroke engines 65

Industrial

Drying
Drying equipment and relative costs 18
Effect of air humidity on drying of grain 18
Explosion reliefs for drying ovens 24
Gas-fired spray driers 104
Suspension-drying of sawdust 176

Heating
Applications and equipment for gas in California 24
Cntrol of steel-mill mixed-gas 4
Continuous aluminum melting furnace 4
High-temperature radiant heat 219
Industrial heating furnaces 4
Light insulating brick cutting heating-up time 4
LP-G for metal cutting and brazing 43
Magnetic-slurry model of flame 104
Manufacture of porcelain enamel 64
Metal-finish baking with gas 4
Nomograph for combustion 176
Oxygen in iron-enamel adherence 197
Process heat from nuclear reactors 104
Protective atmosphere equilibrium composition 5
Radiant heating for industrial applications 175
Schwank burners drying molds 104
Submerged combustion burner 45
Submerged combustion equipment applications 84

Refrigeration
Absorption refrigeration machines 40
Concentration of absorbent solution 102
Increasing load and profit with gas refrigerators 158
Refrigeration and air conditioning 100

Metallurgical

Carburization
Carburizing atmospheres infrared analysis 175
Control of salt baths 104
Controlled atmosphere furnace 104

Heat Treatment
Data for heating steel copper and aluminum 84
Effect of heating rate on metal flow 220
Experiences in heating of steel 197
Extruding metal with glass lubricants 64
Heat treating to produce oil field casing 44
Induction heating equipment 104
Molten salt baths for quenching 4
New heat treating gives bright-finished, distortion-free results 197

Ore Reduction
Gaseous fuel used in metal-oxide fluidized reduction to metal 124
Reducing iron ores by methane 108

Power Generation
Beznau turbine electric power station 124

W

WATER
Adsorbed water on silica gel 235
API committee on wastes: history, activities 166
Contact heaters for power plants 78
Dianodic water treatment and magnesium anodes 172
Disposal of gas-works effluents 97
Disposal of waste products from fission 77
Economics in disposal of oil field wastes 52
Extension of Keenan steam tables 159
Flue gases strip H_2S from foul water 52
Forced draft cooling tower 77
Fresh water for the future 58
Model waste-disposal system 32
Reuse of water by removing sulfides and phenol 169
Salts for control of humidity 34
